

# Is your City/Region interested in joining the FOODSHIFT 2030 EU H2020 programme?

## About FoodSHIFT 2030

FoodSHIFT2030 is a European Innovation Action of the H2020 Programme, aiming at shifting the urban food systems towards more sustainable food systems, based on more plant-based, local and sustainable diet.

FoodSHIFT 2030 is putting citizens at the center of food system change in a novel approach to scale-up, multiply and share the best food innovations European communities have to offer. In partnership with engaged citizens, NGOs, SMEs, researchers, local administration and policy makers we are working with nine cities (FoodSHIFT Accelerator Labs) across Europe to incubate food system innovations. Through events, tools and resources, we will share these innovations and inspire more cities to join a food systems shift.

## Benefits of joining and becoming a FoodSHIFT fellow city-region and establishing a FoodSHIFT Enabler Lab (FEL)

The fellow city-regions will participate to the project in many ways:

- General advice and support from their synergistically paired frontrunner city (FAL)
- Some travel expenses paid for exchange visits between FALs and FELs
- Be partner in the online platform “opportunities market place”
- Access to online exclusive peer-learning events
- Access to all material and the FoodSHIFT consortium meetings, i.e. showcases in the FALs’ city-regions (with a completed non-disclosure agreement)
- Access to support on specific innovation focus from other cities, depending on availability of the experts involved in the FoodSHIFT project

## What do you need to do?

We would love you to join in the programme, but first we need your details and areas of interest (complete the form below).

We need a primary contact person(s), to commit to participate to the above-mentioned events on a regular basis. The primary contact/organisations will need to provide a link to other local organisations and individuals in your city-region engaged in your food work and this programme. The primary contact together with local partner organisations must be willing to commit to being part of the programme until end of 2023, ideally forming mutually beneficial partnerships.
